

Hoof Boot Size Charts

I have attempted to gather together all of the size charts for all of the removable hoof boots that are available to purchase in the UK.

Notes: 1) not all of these boots are suitable for all purposes. Discuss the intended usage of the boot with your hoof care provider when deciding which boots to purchase. 2) Charts accurate as at 27th April 2021. Things change frequently in the hoof boot market. I will continue to update as I become aware of new sizes and styles of boots. If you think I have missed any, please drop me a message through my facebook page (I have chosen to ignore blue-ons as I consider these to be shoes)

Cavallo Boots

Cute Little Boots (CLB)

CLBs come in Slim and Regular sole. The Slims are 10mm narrower than the length measurement.

Size	Width (mm)	Length (mm)
M1		62-72
M2		72-82
M3		83-92
M4		93-102

Simples, Sports, Treks, ELB, Transport Air

The Regular fit might not be suitable for a hoof width that exceeds the length by more than one size. Treks and ELBs tend to come up a little smaller than Simples.

The Slim fit is 6mm narrower than the length

Transport Air only available in regular sole. If the hoof size is close to the top of the range of a boot size, go up one boot size.

Size	Width (mm)	Length (mm)
0		102-109
1		110-117
2		118-125
3		126-133
4		134-141
5		142-149
6		150-157

Bigfoot Boots (BFB)

Only available in ELB regular soles

Size	Width (mm)	Length (mm)
7		158-165
8		166-173
9		174-181
10		182-189

Delta Boots

Made by Cavallo, but size designations are different. The fit might not be suitable for a hoof width that exceeds the length by more than one size.

Size	Width (mm)	Length (mm)
000		102-109
00		110-117

3	137-162	137-162
4	163-180	163-180

Equine Fusion Jogging Shoes

Active, All Terrain, Trekking, Recovery, Ultra, Ultimate

Trekking seems to come up small on upright hooves.

Recovery comes up big due to the thinner material to allow room for hoof bandages. Slim not available in Recovery model.

Size	Width (mm)	Length (mm)
7 Slim	Up to 60	66-75
7	Up to 70	66-75

145x145	140	140
150x150	150	150

Scoot Boots

General rounding rule: select the smaller boot size if you are between the size measurements. For example if your hoof length measurement is between 121mm and 124mm long, select the hoof measurement of 120mm on the chart meaning you would need size 3

Size	Width (mm)	Length (mm)
